

# The 6<sup>th</sup> International Conference on Mechanics and Energy

## Conference Presentation

**ICME 2021** is the **sixth** edition of the International Conference on Mechanics and Energy. The main objective of this conference is to bring together academics, researchers and industry on different themes to discuss new scientific advances and technological innovations in several fields around mechanics and energy.

As usual this version contains the symposium on Computational and Experimental Investigations of Fluid and Structure Dynamics: **CEFSD**.

To give more opportunities for technologists and industrialists to participate, the Industrial Technology Forum (**IFT**) has been included in the main sessions of this conference since the last version.
